**Film Graphics**

## **RÉSUMÉ**

I am an expert Print Graphic Artist with over 25 years of experience in design for films, TV and commercials.

I created and owned 'Graphix in Motion', the first art studio ever to use the computer for the design and production of applied printed props and set graphics. This successful business was ultimately sold to LA's first prop rental house. I am currently available for work either on staff or as a freelance artist.

As a Graphic Artist within a production, I bring a focus on quality and immediate solutions to challenging design problems, saving the production time and money. I am trained in classic traditional printing methods and state of the art digital printing processes, as well as package design. I also have good penmanship and I am often asked to write prop letters in longhand. I own and work with powerful Macintosh computers and peripherals and I have access to a vast network of support services available around the clock.

I am fluent in French, both spoken and written. I am an active member of IA's Local 800.

I am a U.S. Citizen and I'm a heck of a nice guy too...

Please feel free to contact me at your convenience.

Attached is a list of films and television projects for which I have been involved as a graphic artist.
